#### APPROVAL OF THE MOROCCAN CAPITAL MARKET AUTHORITY (AMMC)

In accordance with the provisions of the AMMC circular, issued pursuant to Article 5 of Law No. 44-12 on public offerings and information required of legal entities and savings organizations, this prospectus was approved by the AMMC on 01/03/2024 under the reference VI/EM/005/2024. This Securities Note forms only part of the AMMC-approved prospectus.

The latter consists of the following documents:

- this Securities Note;
- the Reference Document for the 2022 financial year and the first half of 2023, registered with the AMMC on January 9, 2024 under reference no. EN/EM/002/2024.

# **DISLAIMER**

The Moroccan Capital Market Authority (AMMC) approved on March 1, 2024 a prospectus relating to the issue of ordinary shares through a capital increase by cash contribution and offset of liquid and due receivables.

The AMMC-approved prospectus is available at any time at Managem's headquarters, on the company's website (<a href="http://www.managemgroup.com/medias/communiques-et-publications-0">http://www.managemgroup.com/medias/communiques-et-publications-0</a>) and from the financial advisor. It is also available within 48 hours from the centralizing and order-collecting body.

The information package is available to the public on the AMMC website www.ammc.ma.

This summary has been translated by LISSANIAT under the joint responsibility of the said translator and Managem. In the event of any discrepancy between the contents of this summary and the AMMC-approved information package, only the approved information package shall prevail.

#### PART I: PRESENTATION OF THE OPERATION

#### I. AMOUNT OF THE OPERATION

Managem plans to carry out a capital increase by cash contribution and/or offset of liquid and due receivables for an amount of MAD 2,997,388,800 through the issue of a maximum number of 1,873,368 shares at a subscription price per share of MAD 1,600, i.e. MAD 100 as nominal value and MAD 1,500 as issue premium. The total amount of the capital increase will be a maximum of MAD 2,997,388,800, including MAD 187,336,800 in nominal value and MAD 2,810,052,000 in issue premium.

### II. FRAMEWORK OF THE OPERATION

#### II.1. Framework of the operation

Managem's Board of Directors, held on July 12, 2023 under the chairmanship of Mr. Imad Toumi, decided to propose to the Extraordinary Shareholders' Meeting a capital increase of a maximum amount of MAD 3,000,000,000, including issue premium, through the issue of new shares, to be paid up by cash contributions and/or by offsetting against certain, liquid and due receivables from the Company.

The Extraordinary General Meeting of Managem shareholders, held on September 19, 2023, resolved to increase the share capital, including issue premium, by a maximum total amount of three billion dirhams (MAD 3,000,000,000), through the issue of new shares with a par value of MAD 100, to be fully paid up upon subscription, in terms of both nominal value and issue premium, by cash contributions and/or by offsetting against certain, liquid and due receivables from the Company.

The new shares will be entitled to dividends from the date of finalization of the capital increase, and will be assimilated to existing shares from the date of their creation, subject to all the provisions of the Articles of Association and the decisions of Shareholders' Meetings.

The Annual General Meeting, pursuant to the provisions of Articles 189, 190 and 191 of Act 17-95 on public limited companies, as amended and supplemented, has resolved:

- to increase the share capital, including issue premium, by a maximum of MAD3,000,000,000, through the issue of new shares with a nominal value of MAD100, to be fully paid up at the time of subscription, in terms of both nominal value and issue premium, by cash contribution and/or by offsetting against certain, liquid and payable receivables from the Company;
- that the Company's shareholders may exercise their preferential right to subscribe to the new shares on an irreducible basis, in proportion to the number of shares they hold in the share capital, and on a reducible basis. If shareholders do not subscribe to the shares to which they are entitled on an irreducible basis, the shares thus made available will be allocated to shareholders who have subscribed, on a reducible basis, to a higher number of shares, in proportion to their share in the current capital and within the limit of their requests and without allocation of fractions;
- that the new shares issued will carry dividend rights as from the date of final completion of the capital increase and will, for all other purposes, be assimilated to existing shares from the date of their creation, and will be subject to all the provisions of the Articles of Association and the decisions of the Shareholders' Meetings:
- that it has granted full powers to the Board of Directors to carry out the capital increase. For this purpose, to receive subscriptions and payments, to deposit the funds in accordance with the legal conditions, to record any payment in full, to amend the company's articles of association accordingly and, in general, to carry out the formalities and do all that is necessary to carry out these decisions and finalize the capital increase decided upon.

By virtue of the powers vested in it by the aforementioned General Meeting, the Board of Directors has decided to set the issue price of the new shares at MAD1,600 per share.

Shareholders will be able to exercise their preferential subscription rights on an irreducible basis, on the basis of 3 new shares for 16 preferential subscription rights.

The reference shareholder Al Mada has waived 12 preferential subscription rights.

Consequently, the Board notes that the maximum number of new shares to be issued would be 1,873,368 shares with a nominal value of MAD100 each, and an issue premium of MAD1,500 per share.

The share capital would thus be increased by a maximum of MAD187,336,800, from MAD999,130,800 to a maximum of MAD1,186,467,600.

Shareholders with insufficient preferential subscription rights to subscribe for a whole number of new shares may acquire the necessary rights. They may also sell rights giving rise to fractions. Subscription rights will be freely tradable in accordance with current regulations.

If subscriptions for excess and irreducible shares have not absorbed the entire capital increase, the Board of Directors may decide to limit the amount of the capital increase to the amount of subscriptions received at the end of the subscription period.

The Board of Directors specifies that the new shares issued will be assimilated to existing shares from the date of their creation, and will be subject to all the provisions of the Articles of Association and the decisions of General Meetings. They will be entitled, in the same way as existing shares, to the distribution of profits and any other rights that may be decided by the Company from the date of final completion of the Operation.

As a result of the above, shareholders will be entitled to exercise their irreducible preferential subscription rights on the basis of 3 new shares for 16 PSRs.

By virtue of the powers vested in it by the aforementioned meeting, and of the authorization to subdelegate granted, the Board of Directors confers full powers on the Chief Executive Officer or on any person specially designated by him, to:

- Sign the legal documentation relating to the capital increase;
- Set the opening and closing dates of the subscription period;
- Inform shareholders of the terms and conditions of the capital increase;
- Collect subscriptions and corresponding payments;
- Designate financial intermediaries;
- Open an unavailable account with one of the company's banks under the heading "Managem Capital increase";
- If applicable, extend the subscription period if irreducible and reducible subscriptions have not absorbed the entire capital increase;
- Send the signed financial statements to the company's Statutory Auditor for certification;
- draw up, sign and file with the clerk of the Casablanca Commercial Court or have filed by any authorized bearer - the declaration of subscription and payment, a statement of subscriptions and payments, the request for an amending entry in the Commercial Register, as well as the other documents provided for by law;
- And generally, make all declarations, carry out all filings, advertise and complete all formalities.

In addition, pursuant to the provisions of article 199 of law 17-95 relating to public limited companies, the Board of Directors approved the shareholders' current account granted by Al Mada to its subsidiary Managem.

The statutory auditors have thus certified the accuracy of this closing of accounts, which shows a credit balance of MAD 1,500,000,000 as of 21/02/2024, held by Al Mada on the Company.

By virtue of the powers vested in him by the Extraordinary General Meeting of Managem shareholders held on September 19, 2023, and of the sub-delegation authorization granted by the Board of Directors on February 21, 2024, the Chief Executive Officer has decided to set the terms and conditions of the operation, in particular the opening

SSANAT Web Company of the Company of

and closing dates of the subscription period, which will run from March 14, 2024 to April 2, 2024, with no possibility of extending the period.

# II.2. Objectives of the operation

In view of the company's strategic plan for the next few years and the investments planned for the development and construction of new mining projects, the Board of Directors, at its meeting on July 12, 2023, deemed it necessary to rationalize the company's financial structure by strengthening its equity capital and increasing its possibilities of mobilizing other means of financing accordingly.

# III. OPERATION TIMETABLE

The timetable for this operation is as follows:

Order	Steps	Date
1	Issue by the Casablanca Stock Exchange of the operation approval notice	01/03/2024
2	Receipt by the Casablanca Stock Exchange of the AMMC-approved prospectus.	01/03/2024
3	Publication of the prospectus extract on Managem's website	01/03/2024
4	Publication by the Casablanca Stock Exchange of the operation notice	04/03/2024
5	Publication of a press release by Managem in a legal gazette	04/03/2024
	Detachment of subscription rights;	
6	Publication of the theoretical value of the subscription right;	11/03/2024
	Adjustment of the share price;	
	Clearing of the order book.	
7	Opening of the subscription period and listing of preferential subscription rights	14/03/2024
8	Closing of the subscription period	02/04/2024
9	Cancellation of preferential subscription rights	03/04/2024
10	Receipt of subscription amounts by the centralizing body	08/04/2024
11	Final centralization and allocation of subscriptions	09/04/2024
12	Holding of the meeting to ratify the capital increase;	15/04/2024
	Restitution of residual capital to subscribers.	
13	Receipt by the Casablanca Stock Exchange of the minutes of the meeting having ratified the cash capital increase and of the results of the cash capital increase.	16/04/2024
	Delivery of new shares;	
14	Admission of new shares;	17/04/2024
	Registration of the operation on the stock exchange;	

SSANAT Water State of the state

	Publication by the Casablanca Stock Exchange of the operation results.					
15	Publication of Managem's capital increase results	18/04/2024

# IV. FINANCIAL INSTRUMENTS OFFERED

# IV.1. Characteristics of the securities offered

Type of securities	Ordinary shares all of the same class
Legal form	Shares covered by this operation are all bearer shares. These shares will be fully dematerialized and admitted to trading on Maroclear.
Maximum amount of operation	MAD 2,997,388,800
Maximum total number of shares to be issued	1,873,368 new shares to be issued in connection with the capital increase
Subscription price	MAD 1,600 per share
Nominal value	MAD 100 per share
Share premium	MAD 1,500 per share
Share payment	Shares issued are fully paid up and free of any commitment.
Listing line	1 <sup>st</sup> line
Listing of new shares	Shares issued as a result of this capital increase will be assimilated to existing shares and will be listed on the 1 <sup>st</sup> line of the Casablanca Stock Exchange.
Date of dividend entitlement	01/01/2023
Subscription period	From 14/03/2024 to 02/04/2024 inclusive
Tradability of shares	The shares involved in this operation are freely tradable on the Casablanca stock exchange.
Method of share settlement and payment of share transfer price	In cash and/or by offsetting liquid and due receivables from the Company
Rights attached to newly-issued shares	All shares benefit from the same rights, both in the distribution of profits and in the distribution of liquidation surpluses. Each share carries one voting right at General Meetings.
Listing date	17/04/2024
Denomination	Managem
Ticker	MNG
ISIN	MA0000011058
Listing compartment	Principal A
Business sector	Mining

Trading cycle	Continuous
Registration body	Attijari Intermédiation

# IV.2. Characteristics of preferential subscription rights

Preferential Subscription Rights	For the subscription of the new shares issued, the preferential subscription rights reserved for shareholders under the provisions of article 189 of law 17-95 on public limited companies, as amended and supplemented, will be maintained at the rate of one preferential subscription right for one existing share. Each shareholder may either exercise or sell their preferential subscription right, or, if they so wish, waive their preferential subscription right individually.  The Al Mada shareholder has waived 12 pre-emptive rights.  Holders of preferential subscription rights will be able to subscribe on an irreducible basis, on the basis of 3 new shares for 16 preferential subscription rights.  Preferential subscription rights may only be exercised up to the number of preferential subscription rights required to subscribe for a whole number of new shares. Holders of preferential subscription rights who do not hold a sufficient number of preferential subscription rights to obtain a whole number of new shares may buy or sell preferential subscription rights at market conditions during the subscription period.  Fractional preferential subscription rights may thus be sold or added to on the market during the subscription period.  The theoretical price of the preferential subscription rights (PSR) is calculated as follows: PSR = (Closing share price on the day before the date of PSR detachment - subscription price) * ([number of new shares] / [number of existing shares + number of new shares]).  Shareholders will also have the right to subscribe for excess shares, in order to allocate shares not taken up by the exercise of irreducible subscription rights. This allocation will be made in proportion to their share in the capital, within the limit of their requests and without
	fractional allocation.
PSR listing date	14/03/2024
Ticker	SMNGB
Denomination	DS MNG 3/16 2024
Trading cycle	Fixing
Fate of unexercised PSRs	Shareholders' preferential subscription rights to the new shares issued must be exercised during the subscription period, failing which they will be forfeited.
PSR trading	Preferential subscription rights relating to the current capital increase will be freely tradable on the Casablanca Stock Exchange under the same conditions as the MNG share itself, throughout the subscription period running from 14/03/2024 to 02/04/2024 inclusive.

#### IV.3. Assessment elements of offer terms

#### IV.3.1. Price of shares offered

The Extraordinary General Meeting of Managem shareholders held on September 19, 2023, convened by the Board of Directors on July 12, 2023, resolved to increase the share capital by a maximum amount of MAD 3,000,000,000 through the issue of new shares to be paid up in cash and/or through the conversion of liquid and due receivables.

The same meeting delegated the necessary powers to the Board of Directors to carry out the capital increase, set the terms and conditions, record its completion and amend the Articles of Association accordingly.

In accordance with the powers granted to it by the Extraordinary General Meeting of September 19, 2023, the Board of Directors, meeting on February 21, 2024, set the subscription price for the new shares at MAD1,600 per share, including issue premium, representing a 12.1% discount to the closing price of MAD1,820 on February 20, 2024, the day before Managem's Board of Directors met.

The valuation method used to value Managem shares in the context of this Operation is the market price method<sup>1</sup>.

The average share price over various time horizons provides an objective benchmark for valuing Managem shares.

The table below shows the volume-weighted average prices as of 20/02/2024:

	Weighted average price (WAP) (MAD)	Market capitalization based on weighted average price (in mMAD)	Average trading volume	Number of shares traded
Spot price as of 20/02/2024	1 820	18 184	169 260	93
1-month average (from 22/01/2024 to 20/02/2024)	1 826	18 245	2 292 771	27 622
3-month average (from 21/11/2023 to 20/02/2024)	n 1 734	17 329	2 098 500	77 434
6-month average (from 22/08/2023 to 20/02/2024)	n 1 727	17 254	1 617 460	118 009
12-month average (from 21/02/2023 to 20/02/2024)	n 1 919	19 173	1 607 046	207 680

Source: Casablanca Stock Exchange, Attijari Finances Corp.

For all the horizons studied, the last price used to calculate the WAP is the Managem share price as of 20/02/2024.

The weighted average price of Managem shares calculated over the periods of 1 month, 3 months, 6 months, 12 months, ending on 20/02/2024 (inclusive) were respectively MAD 1,826, MAD 1,734, MAD 1,727 and MAD 1,919 per share, representing an equity valuation of mMAD 18,245, mMAD 17,329, mMAD 17,254 and mMAD 19,173 respectively.

The Board of Directors meeting of 02/21/2024 set the issue price at MAD 1,600, representing a 12.1% discount to the share price of MAD 1,820 at 02/2024. The MAD 1,600 subscription price represents a discount of 12.4% to the 1-month WAP, 7.8% to the 3-month WAP, 7.4% to the 6-month WAP and 16.6% to the 12-month WAP.

The 12-month WAP calculation has been adjusted to exclude data from 02/05/2023 relating to the intra-group transaction between Al Mada and SFGP concerning 4.9% of Managem shares. This involves a reclassification of Managem shares within the Al Mada Group.

<sup>&</sup>lt;sup>1</sup> Weighted average price for the period = Sum of volumes traded for the period / Sum of quantities for the period.

### IV.3.2. Price assessment methodology

### **Discarded valuation methods**

# Discounted cash flow (DCF)

This method consists of calculating the value of a company's economic assets (enterprise value) by the sum of the future cash flows generated by them (Free Cash-Flow to the Firm) discounted at the weighted average cost of capital. The weighted average cost of capital (WACC) is representative of the return required by providers of funds (shareholders and creditors), weighted by their respective levels of commitment to financing the company's economic assets. Once the enterprise value has been determined, the value of shareholders' equity is obtained by deducting net debt.

Given that Managem's business is subject to metal price volatility, and that it also depends on changes in the asset portfolio, the DCF valuation method has not been used.

# Future dividend discounting (DDM)

Similar to the Discounted Cash-Flow (DCF) method described above, this method is based on the principle of discounting cash flows. It involves calculating the value of the company's equity by discounting the future dividends expected to be paid to shareholders at the cost of equity (corresponding to the shareholders' return requirement). The value of shareholders' equity (Ve) corresponds to the sum of (i) the discounted dividends that the company expects to pay its shareholders over the explicit time horizon, and (ii) the discounted terminal value.

Given that Managem's business is subject to metal price volatility, and that it also depends on changes in the asset portfolio, the DDM valuation method has not been used.

# Stock market comparables

The stock market comparables method is an analogous valuation method for estimating a company's equity value based on the valuation levels of comparable companies listed on the stock market.

Several parameters need to be verified when applying this method, notably the consistency of the assumptions underlying the construction of the benchmark comparables (growth, risk, size, business sector, legal/tax/regulatory environment, accounting standards, etc.).

Due to significant differences in the market capitalizations of the companies in the samples compared with Managem, as well as differences in their operating profiles, the comparable companies method has not been used.

### Transactional comparables

This method involves valuing a company on the basis of the implied valuation multiples of a sample of transactions that have taken place in its sector of activity, and whose target companies have comparable financial and operating characteristics to the company being valued.

Given the unavailability of public and verified financial information (such as transaction amounts and implied multiples) relating to recent previous transactions involving companies comparable to Managem, this method has not been used.

### **Valuation method used:**

The valuation method used to value Managem's shares in this operation is the stock market price method<sup>2</sup>.

The stock market price method consists of assessing the value of a company by reference to its price on the stock market. The relevance of this method depends on the efficiency of the stock market on the one hand, and the liquidity of the stock on the other. The share price valuation method thus makes it possible to assess the value of a company's equity capital based on a weighted average of share prices over a representative time horizon.

<sup>&</sup>lt;sup>2</sup> Weighted average price for the period = Sum of volumes traded for the period / Sum of quantities for the period

Managem is a company listed on the Casablanca Stock Exchange, with a liquidity<sup>3</sup> of 2.1%<sup>4</sup> over a rolling 12-month period (from 21/02/2023 to 20/02/2024). The share price enables us to assess the value of the company's equity, based on a volume-weighted average price over a representative horizon.

# IV.3.3. Assessment elements of offer price

The following graph shows Managem's share price from 22/02/2021 to 20/02/2024:

Managem's share price has risen by 40.0% (vs. a 12.5% rise in the MASI) over the past 36 months. In addition, it should be noted that the Managem share price as of 20/02/2024 was MAD 1,820, up 40.0% on the 22/02/2021 price of MAD 1,300.

Over the period, Managem's share price experienced two main phases: (i) an uptrend (May 2020 - February 2023) following the continued rise in the international prices of the main metals, and (ii) a downtrend (March 2023 - September 2023) following the fall in the prices of precious metals, geopolitical and economic instability, as well as lower earnings in the first half of 2023. In 2024, Managem's share price showed an upward trend, mainly due to the rise in gold prices, which exceeded \$2,000/ounce on the world market.

The table below shows the discount on the subscription price of the shares involved in this operation (i.e. MAD 1,600 per share including issue premium) compared with the average share price over the last three, six and twelve months:

In MAD	
MNG share subscription price	1 600
Share price as of 20/02/2024	1 820
Discount (-) / premium (+) to share price	-12.1%
WAP (last 3 months to 11/21/2023)	1 734
Discount (-) / premium (+) to 3-month WAP	-7.8%
6-month WAP (last 6 months to 08/22/2023)	1 727
Discount (-) / premium (+) to 6-month WAP	-7.4%
WAP (last 12 months to 02/21/2023)	1 919
Discount (-) / premium (+) to 12-month WAP	-16.6%

<sup>&</sup>lt;sup>3</sup> Liquidity ratio for the period = Sum of volumes traded over 12 months / Market capitalization based on 12-month WAP

SSANCAT THE STANCE OF STANCE T

Prospectus Summary – 10

<sup>&</sup>lt;sup>4</sup> The liquidity ratio for the period has been adjusted to exclude data from 02/05/2023 relating to the intra-group transaction between Al Mada and SFGP concerning 4.9% of Managem's shares.

Based on a share price of MAD 1,600, the P/E, P/B and EV/EBE valuation multiples (pre-money) are as follows:

In MAD, otherwise specified	
Reference price	1 600
2022 earnings per share	162
P/E <sup>5</sup> - indicative (x)	9.9x
2022 Group share of shareholders' equity (in MMAD) per share	758
P/B <sup>6</sup> - indicative (x)	2.1x
Enterprise value <sup>7</sup> based on a price per share of MAD 1,600	20 330
2022 <sup>8</sup> consolidated EBITDA (in MMAD)	1 870
EV/EBITDA - indicative (x)	10.9x
Number of shares	9 991 308
Number of post-money shares	11 864 676

Source: Managem

It should be noted that Managem has not been involved in any financial transaction over the past 12 months giving rise to a valuation.

- Dahir no 1-58-229 of 4 Moharem 1378 (21 July 1958) supplementing and amending the Dahir of 9 Rajab 1370 on mining regulations;
- decree no 2-59-392 of 25 Hija 1378 (July 2, 1959) supplementing decree no 2-57-1647 of 24 Jumada 1377 (December 17, 1957) fixing certain applications of the provisions of the Dahir of 9 rajab 1370 (April 16, 1951) relating to mining regulations;
- Dahir no1-62-097 of 16 Safar 1382 (July 19, 1962) supplementing and modifying the Dahir of 9 Rajab 1370 on mining regulations;
- Dahir no 1-62-193 of 24 Journada 1 1382 (24 October 1962) amending the Dahir of 9 Rajab 1370 on mining regulations;
- decree no 2-80-273 of Rebia 1 1401 (January 9, 1981) approving the book fixing the procedure applicable to the adjudication of concessions provided for in article 89 of the dahir of 9 Rajab 1370 (April 16, 1951) on mining regulations;
- decree no2-79-298 fixing the attributions and organization of the Ministry of Energy and Mines.

By virtue of its listing on the Casablanca Stock Exchange, it is subject to all the legal and regulatory provisions relating to financial markets and in particular:

- Dahir no 1-16-151 of 21 kaada 1437 (August 25th 2016) relating to the promulgation of Law no19-14 relating to the Stock Exchange, brokerage firms and financial investment advisors:
- the general regulations of the Stock Exchange approved by the Order of the Minister of Economy and Finance no2208-19 of July 3, 2019;
- the General Regulation of the Moroccan Capital Market Authority as approved by Order no2169-19 of the Minister of Economy and Finance;
- Dahir 1-95-3 of January 26, 1995 promulgating Act 35-94 relating to certain negotiable debt instruments, as amended and supplemented;
- the circular of the Moroccan Capital Market Authority;
- Dahir 1-96-246 of January 9, 1997 promulgating Act 35-96 relating to the creation of a central depository and the institution of a general system for the registration of certain securities in accounts (amended and supplemented by Act 43-02);
- the General Regulations of the central depository approved by Order of the Minister of the Economy and Finance no932-98 of April 16, 1998 and amended by Order of the Minister of the Economy, Finance, Privatization and Tourism no1961-01 of October 30, 2001 and Order no77-05 of March 17, 2005;
- Dahir no1-04-21 of April 21, 2004 promulgating Act no26-03 relating to public offers on the Moroccan stock market, amended and supplemented by Act 46-06;
- Act 43-12 relating to the Moroccan Capital Market Authority;
- Act 44-12 relating to public offerings and the information required from legal entities and organizations making public offerings.
- Managem is governed by common law tax legislation. It is subject to corporate income tax. Its operations are subject to VAT at a rate of 20%.

# Tax system

#### I. BRIEF OVERVIEW OF MANAGEM'S ACTIVITY

The Group Managem was created in 1928 and currently operates in three business segments: research, exploitation and valorization.

Managem's historical business consists of prospecting, extracting, developing and marketing various minerals, namely base metals (copper, zinc, lead), precious metals (gold and silver), special metals (cobalt cathode, nickel, etc.) from the hydro-metallurgical activity, and finally useful substances (fluorite).

MANUAL TO STATE OF THE PARTY OF

# **Production**

# **PART IV: RISK FACTORS**

### Risks relating to Managem's activity

Given the nature of its activities, Managem Group is exposed to a certain number of risks, as detailed below:

#### Risks related to variations in the price of raw materials

Due to Managem's activity, its sales are conditioned by prices set on international markets. Its sales may be significantly affected by fluctuations in raw material prices, whether upward or downward.

In order to limit the fluctuation risks related to changes in raw material prices, Managem may use hedging instruments for products that it markets and that are traded on organized markets. The hedging relationship corresponds to the hedging of future cash flows arising from future sales of raw materials (zinc, lead, copper, silver and gold) determined based on a production schedule. Derivative instruments are intended to hedge a forecast budget or future cash flows. It is a cash-flow hedge type relationship.

Managem's development plan takes this risk into account and has as its main objective the diversification of products sold, focusing on products with a very high resistance factor (precious metals) and products with very buoyant fundamentals over the medium and long term (copper, cobalt, zinc, etc.).

Managem's resilience to fluctuations in raw material prices should be noted, given the competitiveness of its cash costs. Indeed, the cash costs of Managem's various products are well positioned in relation to the competition.

### **Hedged price risk**

Given the nature of its activities, the Managem Group is highly exposed to fluctuations in the prices of the raw materials it sells at the exchange rates used in its sales.

The hedging policy aims to protect the Managem Group from price risks likely to have a significant impact on its profitability in the short and medium term.

In order to manage these market risks, the use of derivative financial instruments (commodities and foreign exchange) is permitted for the sole purpose of hedging.

Derivatives used by the Group are qualified as cash flow hedges or trading derivatives under IAS 39.

### **Currency risk**

The Group's foreign exchange risk policy is designed to hedge highly probable foreign currency budgetary exposures and/or firm import and export commitments.

Future foreign currency exposures are determined as part of a regularly updated budget procedure. The current hedging horizon does not exceed one year at each balance sheet date.

Currency hedging instruments are intended to cover a forecast budget or future cash flows. It is a cash-flow hedge type relationship.

Most of Managem's export sales are denominated in dollars and, to a lesser extent, in euros. As a result, sales can be significantly affected by exchange rate fluctuations.

In order to limit foreign exchange risk, Managem uses currency hedging contracts. It should be noted that this risk could be mitigated by the existing negative correlation between the dollar and raw material prices.

THE STATE OF THE S

# Risks related to resources and reserves

Ore reserves are a fundamental element in the operation of a purely mining company. As a result, once reserves are exhausted, the mine is closed and the company's operations cease.

For Managem, this risk is mitigated by the fact that it has quality deposits with significant discovery potential, good exploration performance and low research costs. Indeed, Managem devotes a significant budget each year to exploration, both locally and internationally, in order to increase its current resources and to have several sources of ore supply, which limits this risk.

It should be noted that Managem's performance in terms of exploration (balance sheet of discoveries, quality of resources, etc.) is audited annually according to the Canadian standard "NI 43-101" by an international firm.

Furthermore, ore grade remains an important factor in the production level of a mining company. Managem's indepth knowledge of the site, control of the production process and expertise in research and development are assets that enable it to contain the variation in average grades recorded annually within a stable range, or to smooth the average grade curve to be as close as possible to the forecast data established by the operating program for each mine.

### **Technical risks**

Technical risks are inherent in any mining activity. To contain them, Managem has in-depth knowledge of deposits and facilities, control of the production process and in-depth expertise.

For new projects, Managem conducts pilot and laboratory tests as well as pre-production trials. This approach makes it possible to identify any problems that may arise during the start-up of operations and to make the necessary corrections to ensure the smooth running of the exploitation phase.

#### Safety and environmental risks

Given the specific nature of the tasks involved in mining and hydrometallurgy, i.e. depths of up to several hundred meters and the handling of hazardous products, certain risks weigh on the operation and its employees.

To address these risks, Managem has developed several programs aimed at improving safety in mines and on production sites.

On the environmental front, Managem has set up programs to adapt its production tools and upgrade sites to bring them closer to international standards and anticipate local regulations. In this context, regular diagnostics are carried out and potential risks are examined, resulting in environmental indicators that are gradually improving.

#### Regulatory risks

As Managem operates in several countries with different laws and regulations, the Group is exposed to potential changes in regulations which may in some cases affect mining operations or even their profitability. To mitigate this risk, Managem undertakes to set up specific mining agreements upstream of project start-ups. These agreements, which are discussed and duly validated by the relevant authorities, guarantee preferential and stable conditions, and list the rights and obligations of the legal entity established in the country. This scheme is currently being adopted in Guinea, Sudan and Senegal.

### Risks related to foreign activities

TOTAL STATE OF THE STATE OF THE

Given the developments envisaged internationally, Managem is exposed to risks related to local regulations and political instability in the countries where the Group operates. Nevertheless, this risk is mitigated to the extent that it is integrated into project profitability objectives. It is also mitigated by a strategy of geographic diversification.

#### Social risks

Social risks are managed by Managem through a policy of listening and ongoing dialogue with employee representatives, the granting of benefits that meet employee needs and the involvement of all employees in the implementation of the Group's vision.

## Tax risks

Tax risks are managed by the Managem Group through a policy of exchange and permanent dialogue with the tax authorities of the countries in which it invests. Tax risks are anticipated through the preparation of detailed documentation, particularly on transfer pricing between Managem and its subsidiaries, and through audit assignments and reviews of tax returns, which are carried out virtually every year.

Also, prior to any restructuring operation, requests for clarification of the inherent tax treatment are sent to the tax authorities concerned as part of a prior tax consultation "the tax rescript".

### Risks related to license renewals

In order to avoid the risks associated with the non-renewal of permits, the Managem Group strictly applies the administrative procedure in force that allows for the issue of renewals. This procedure consists of:

- production of a report on previous work carried out on the permit requested for renewal and the expenses incurred;
- production of a report on the estimated work to be carried out and the budgets that will be mobilized in the context of the operation;
- the operating permits requested for renewal are subject to systematic regulatory investigations in the field to enable the Administration to assess the work carried out.

### Risks related to natural disasters

In order to protect itself against the damage that could be caused by a possible natural phenomenon such as flooding, Managem carries out the following prior to any investment project:

- environmental impact studies;
- the implementation of safety plans consisting of the installation of fire networks, evacuation plans, alarms, etc. Likewise, the Managem Group protects itself against possible natural phenomena by taking out insurance policies that would cover possible material and inventory losses and compensation for production stoppages.

### Risks related to Managem's customers

The Managem Group markets commodities including silver, gold, zinc, lead, copper and cobalt (recently listed) listed on international markets. As a result, the risk of losing a potential customer is virtually nil due to the presence of market makers. However, for certain niche or specialty products (Zinc Oxide and Fluorine), this risk is managed through approval processes and the expansion of the customer portfolio.

#### Risks related to geopolitical tensions

AND THE PROPERTY OF THE PROPER

The Group Managem operates on the African continent, where geopolitical instabilities can affect the Group's commercial and industrial performance. The Sudanese crisis has had a direct and significant impact on Managem's results through the suspension of its operations in Sudan.

### Risks related to access to financing

Through its subsidiaries, Managem is involved in various investments, some of which require external financing. Limited or compromised access to financing may restrict the company's growth and operating efficiency. Managem is committed to diversifying its sources of financing as well as its financial partners, and is defining a realistic financing strategy in parallel with the expansion of its project pipeline.

### Risks related to interest-rate volatility

A rise in the cost of debt may limit our ability to raise funds. Managem endeavors to carry out financing operations at competitive rates, positioning itself on curves that reduce financial expenses, and for international debts, hedging instruments are put in place.

#### Risks related to indebtedness

A high level of indebtedness can increase the Group's vulnerability in times of falling commodity prices. Managing financial resources is therefore a priority for the Managem Group, and a balance between cash flow from operations, guaranteed sources of financing and equity contribution is a steering exercise carried out on a regular basis.

### Risk factors relating to the financial instruments offered

### Liquidity risk

Subscribers to Managem shares may be subject to liquidity risk on the stock market. Depending on market conditions and share price trends, the stock's liquidity may be temporarily affected. Thus, a shareholder wishing to sell his or her shares may, to a certain extent, be unable to sell all or part of the shares held within a short timeframe, with or without a discount on the capital.

### Price volatility risks

Listed shares are subject to the rules of supply and demand, which determine their value on the stock market. Share price trends are determined in particular by the achievements and financial performance of listed companies, and the development prospects anticipated by investors. As a result, investors may experience a significant rise or fall in the value of the listed securities they hold.

# Capital loss risk

Participation in a company's capital involves the risks inherent in any investment. Should one or more of these risks materialize, losses may be incurred up to and including the total loss of the contribution and related transaction costs, and thus of the entire capital invested.

In addition, if the investor has borrowed external capital to pay for the investment, the maximum risk is higher, since the obligations arising from the loan contract remain with the lender, regardless of the evolution of the investment in Managem's capital, and the lender may take action against the investor for an amount exceeding the capital invested.

### Risk of dilutive impact on shareholders not taking part in the operation

In the event of non-participation in the operation, holders of preferential subscription rights who have not exercised their rights are exposed to a risk of dilution.

### Risks associated with preferential subscription rights (PSRs)

Holders of preferential subscription rights run the risk of losing the value of their rights at the end of the subscription period. PSRs holders are also exposed to a risk relating to the subscription parity. They may not be able to acquire a sufficient number of PSRs to achieve the required parity.
